

DRI-EAZ LGR 7000XLi

Leading performer in XL category

Breaking the performance barriers as the new category leader, the LGR 7000XLi removes more water than any other dehumidifier in its category! To achieve the 7000's amazing performance, Dri-Eaz engineers developed Advanced Crossflow Technology to maximize energy utilization. Plus, the unit's built-in sensors constantly monitor real time performance data to automatically calculate ideal operating parameters – such as fan speed and defrost cycle duration – in all conditions. The result is XL category busting performance!

PRODUCT FEATURES

- Advanced Crossflow Technology maximizes efficiency even in low grain environments. Ensures best performance across range.
- Self monitoring system. Built-in sensors monitor performance parameters allowing for automatic fan speed adjustments.
- Built-in humidistat and plain English control panel messages
- Sealed large capacity pump basin – more than enough to handle the water from an unintentional defrost that might occur after a power outage or other unexpected shutdown.
- Ergonomic design. Handle 2 in. taller for easier use on stairs, folds down for storage. Integrated cord and hose storage.
- Versatile application – standard 12 in. ductable outlet.
- Legendary rotomolded housing – practically indestructible – resists dents and dings – stackable for storage – saves room in warehouse.
- If power is interrupted during operation, the unit will automatically restart when power is restored. (115V models only.)

Product Specifications

Power	8.3 amps, 115V
Water Removal AHAM (80°F/60%RH)	61.5 lpd
Max. Water Removal at Saturation	111 lpd
Water Removal LGR	40% more than competitive units
Operating Range	33° - 100°F
Process Air (Max.)	325 CFM 552 CMH Floor-level
Filter Type	3M HAF filter 24 pack F368
Dimensions (L×W×H)	20×20×33.5 in.
Weight	107 lbs.
Drain Hose	40ft
Power Cord	25ft
Construction	Rotomolded polyethylene shell
